

Grab Rail

The Grab Rail provides a stable handle for patients to hold while entering or exiting the bed.

The Grab Rail is suitable for patients with some mobility who require additional support while standing up from the bed or sitting back down and can be placed anywhere along the bed frame. It can be secured using 2 easy grip hand knobs and it cannot be used in conjunction with side rails.

Features

- Fixes securely to bed frame
- Helps maintain independence
- Multiple positioning
- Facilitates entry and exiting of bed
